

Next-Generation Al-Discovery for Legal Teams, Forensic Auditors & Investigators

At-a-Glance

- Review bulk documents and data using knowledge mapping and save 100s of hours
- Interrogate data using Al question-and-answer interface
- · Tag evidence and relationships
- Share results using intuitive imagery and charting
- Secure hosting on your server or private cloud; compatible with SeekerXR

Al Bulk-Data Analysis

Discover, explore and map large caches of Electronically Stored Information (ESI) such as documents, emails, attachments and messages. Rapidly summarise, contextualise and analyse overwhelming information. Uncover evidence, themes, relationships, connections, key topics, time relevant events and consequences using Artificial Intelligence.

User-Friendly Platform

Filter, review, tag and visualise data using knowledge maps, email chronologies and link diagrams. Interrogate your data set using the latest advances in Large Language Model (LLM) powered AI with a simple question and answer interface.

Report-Ready Visualisation

Present the headlines behind the data, using modifiable layout, styling and 3D link charting.

Tech Specs

Collaborate securely with a browser-based platform, physically deployed or accessed via the web. Fully compatible with SeekerXR.

Harod Analysis was founded in 2015 by UK law enforcement veterans. Our goal is to provide clients with innovative and cost-effective solutions to investigating crime and risk issues. Harod has developed cutting-edge tools to support investigations in a wide range of scenarios, resulting in the delivery of many successful case outcomes and the identification of billions of USD of hidden assets.

Kineviz was founded in 2015 as a community built on a foundation of technology and creativity. We are a team of scientists, computer engineers, and artists working to connect humans with data. By visualizing complex data we reveal elusive insights that enable better outcomes. From the start, we've remained revenue-funded while supporting world-class businesses, agencies, and nonprofits.
